Competences

C#, SQL
C++, VB.Net, JAVA
HTML, CSS3, JS
PHP
React Native, Python

Personal projects

Completed various side projects during university to reinforce technical understanding and explore gameplay systems. Portfolio: <https://jordiporta.github.io/Portfolio>

About me

I enjoy building backend systems that are reliable, efficient, and easy to scale. I usually work with C++, C#, and SQL, and I like solving tricky problems related to performance or system design. Writing clean, modular code matters to me, and I really enjoy working with people from different areas to turn complex ideas into something real and functional.

Experience

Technical consultant

Distrigital | July 2025 - Present

- Assisting in technical analysis and implementation for client-facing software solutions.
- Collaborating with teams to identify system requirements and resolve technical issues.
- Currently onboarding and contributing to early-stage tasks within the team.

Software engineer

Roberlo | June 2024 - September 2024

- Added functionality to the application for clients and developed additional features for internal company users.
- Created precise documentation of processes and ensured proper use of relational databases.
- Conducted code reviews, debugging, and used the SCRUM methodology for project management.

Studies

University of Girona

Bachelor's Degree in Computer Science | September 2021 - June 2025

Feature

Teamwork:

Effective communication, adaptability, and a positive contribution to group dynamics.

Problem-Solving Skills:

Ability to analyze complex problems and develop efficient and effective solutions.
